EDUCATION

University of Southern California, Los Angeles, CA

Aug 2026 – May 2028

Master of Science in Computer Science

Coursework: *Analysis of Algorithms (CSCI-570)*, *Database Systems (CSCI-585)*

Dwarkadas J. Sanghvi College of Engineering, Mumbai, India

Nov 2022 – May 2026

Bachelor of Technology in Information Technology with *Honors in DevOps*

(CGPA 9.05/10)

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, TypeScript, Java, C++, C, SQL
- **AI/ML:** PyTorch, LangChain, Hugging Face, Scikit-learn, RAG, Generative AI
- **Frameworks:** FastAPI, Next.js, React, Node.js, Express.js
- **Databases:** PostgreSQL, MongoDB, Supabase, Redis, Pinecone
- **Cloud/DevOps & Tools:** AWS, Docker, GitHub Actions, Git, GitHub, VS Code, Cursor, Postman, Kaggle, Codex

PROFESSIONAL EXPERIENCE

Software Engineer Intern, Quickearning Pvt. Ltd., Mumbai, India

Jul 2025 – Sept 2025

- Built scalable AI analytics pipelines using **Python**, **Pandas**, and **FastAPI**, achieving **150ms P80 latency** across **National Stock Exchange (NSE)** and **Bombay Stock Exchange (BSE)** market data for real-time financial analytics.
- Developed a **multi-agent stock prediction system** integrating **LangChain**, **Hugging Face**, **LSTM**, and **FinBERT** for time-series forecasting and sentiment analysis, enabling real-time market insights through **WebSocket APIs**.
- Migrated modular **React** architecture to **Next.js** with **SSR**, and replaced **Redux** with **Zustand** for streamlined state management, improving performance, SEO, scalability, and maintainability across the application.

ACADEMIC PROJECTS

Zircle | Tech: *Python, FastAPI, PostgreSQL, Redis, React Native, Expo, TypeScript, PyTorch, Scikit-Learn, Docker, AWS*

- Architected a **FastAPI/PostgreSQL backend** supporting **123 API operations across 101 paths and 36 database models/tables**, using **Redis-backed worker queues** to offload ML inference and analytics; load-tested the hosted API at **1,000 concurrent request slots**, achieving **176.6 req/sec** with **5.16s P95 latency** across 1,040 requests.
- Engineered a resilient **React Native/Expo networking layer** with **SWR/ETag caching**, **request coalescing**, **exponential backoff**, and **optimistic updates**, enforcing CI request budgets of **2–4 API calls per mobile journey**.
- Developed **PyTorch computer vision pipelines** for automated garment classification and wardrobe intelligence, incorporating **style and weather signals** for personalized recommendations and instrumenting inference jobs.

Puch.AI | Tech: *React, TypeScript, Node.js, Express, MongoDB, Google OAuth, Twilio, Groq AI, Vercel*

- Built an **AI-driven email automation platform** integrating **Gmail OAuth** and **Groq AI** to classify subscriptions and intelligently automate inbox management, including archiving, labelling, and personalized replies for users.
- Engineered **4 automated workflows** for email parsing, daily summaries, OTP verification, and rule-based actions, integrating **5+ APIs** with **Node.js**, **Express**, and **MongoDB** for reliable end-to-end email processing.

RESEARCH PAPERS

Knowledge Graph Augmented Multilingual Benchmark for Factual LLM Evaluation

- Develops a **multilingual benchmark** for evaluating LLM factuality, leveraging **knowledge graphs** to enhance factual assessment and mitigate hallucinations across diverse **Indic languages**, domains, and real-world knowledge settings.
- **Accepted for presentation at:** 6th International Conference on Machine Vision & Augmented Intelligence (MAI-2026) and **to be published in** Springer *Lecture Notes in Electrical Engineering (LNEE)* series, **Scopus-indexed** proceedings.

FASAL: Ensemble Crop Recommendation System using Google Earth Engine and XAI Interpretability 

- Presents an ensemble-based crop recommendation framework leveraging **Google Earth Engine** and **explainable AI** to enable accurate, data-driven crop selection, improve model transparency, and support interpretable agricultural decisions.
- **Published in:** 5th International Conference on Emerging Research in Electronics, Computer Science (ICERECT), IEEE.

ACHIEVEMENTS

- **Google Cloud Skill Badges:** Gemini for Cloud Architects, Prompt Design in Agent Platform, Responsible AI, Introduction to Responsible AI, Introduction to LLMs, Introduction to Generative AI 
- Completed **ML x Generative AI '25 Program** by Oxford Machine Learning School & AI for Global Goals 
- Runner-Up among 50+ teams at Techathon Hackathon, MCC College (2025)
- 6th place out of 400+ teams at TechFiesta Hackathon, Pune Institute of Computer Technology (2025)
- Member of Cohere Labs Open Science Community, contributing to research in large language models and applied AI

POSITIONS OF RESPONSIBILITY

- **Research Lead, DJ InIT.ai:** Led a 4-member research team in technical experimentation, and publications **2025–2026**
- **Marketing Head, Google Developer Groups DJSCE:** Led a 15-member team, secured **INR 1 lakh+** in sponsorships, and helped organize a hackathon with **1,000+ registrations** **2024–2025**
